

FinInteract rewards actions that resolve intended interpretation

1. Benchmark instance

What was Meta Platforms' operating income?

Primary ambiguity category: Entity scope

Same question but two defensible readings

Default interpretation

Family of Apps segment

\$62.87B

Intended interpretation

Consolidated GAAP

\$46.75B

Hidden disambiguating context C
Total company (consolidated) results under U.S. GAAP for FY2023

2. Let the agent resolve it

Agent sees question and filing passages

Search / Reason

Part A: answers w/o clarifying

Finds plausible evidence for Family of Apps

Plausible answer but wrong interpretation

Part B: asks a clarifying question

Consolidated or just a segment?

User simulator (answers from C)

Consolidated please.

Answer is \$43.75B

Correct elicitation and answer

3. FinInteract scores the behavior

A Final answer correctness

\$62.87B

Not correct for intended interpretation

\$46.75B

Correct for intended interpretation

B Interaction quality

Path A
(no clarify)

Path B
(clarify)

Asked a clarification?

Targeted right category?

Resolved user intent?

C Single gold benchmark failures

Default capture:
\$62.87B

v.s.

Intended answer:
\$46.75B

A benchmark may reward a defensible default answer even when ambiguity is never resolved.
